SUMMARY

Full-stack software engineer with enterprise QA experience and a 500-hour software engineering program. Builds reliable, user-centered applications with JavaScript, React, Node.js, and Express. Brings practical strength in API validation, test planning, technical documentation, and cross-functional problem solving.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3 · **Frontend:** React, Redux, responsive design, Bootstrap, Figma · **Backend:** Node.js, Express, REST APIs, OAuth2, JWT · **Data & Cloud:** MongoDB, MySQL, GCP, NGINX, GitHub Actions · **Testing & Tools:** Jest, Postman, Xray, Chrome DevTools, Git, GitHub, Jira · **Methods:** Agile, Scrum

EXPERIENCE

Quality Assurance Specialist · Talkdesk · Lisbon, Portugal Jan 2021 – Mar 2023

- Owned end-to-end QA for Salesforce, Microsoft Dynamics 365, and ServiceNow integrations; authored 40+ test plans and led regression cycles that reduced post-release defects by 30%.
- Identified and escalated a critical Salesforce authentication defect before release, preventing impact to enterprise users.
- Partnered with five cross-functional engineering teams to diagnose integration failures using Postman, Xray, and Chrome DevTools, reducing average bug-resolution time by 40%.
- Authored 500+ pages of technical documentation that standardized testing workflows and became a primary onboarding reference.

Swim Coach · Sport Lisboa e Benfica · Lisbon, Portugal Sep 2018 – Nov 2020

- Designed and managed data-informed training programs for 20+ competitive athletes, adapting plans based on performance results.
- Collaborated with senior staff across age groups, strengthening communication, feedback, and team-planning skills.

SELECTED PROJECTS

Relic Helper App · React, Node.js, Express, MongoDB, GCP

- Built a full-stack application that helps Star Wars: Galaxy of Heroes players optimize team rosters through a secure JWT-authenticated REST API.
- Implemented lazy loading and optimized state management to reduce load times by 30%; designed the data model and delivered both frontend and backend.

WTWR (What to Wear) App · React, Node.js, Express, MongoDB

- Built a weather-based clothing recommendation app with a third-party weather API, authenticated accounts, protected routes, and personalized UI.

EDUCATION & CERTIFICATION

TripleTen Coding Bootcamp · Software Engineering Program · Remote · Jan 2023 – Sep 2023
500-hour intensive program in full-stack JavaScript, React, Node.js, Express, MongoDB, REST APIs, and deployment.

University of Lisbon, Faculty of Human Kinetics · M.Sc. Sports Coaching · Lisbon, Portugal · Sep 2016 – Nov 2018

ISTQB Certified Tester, Foundation Level (CTFL)
